ScanPro 2000

All-in-One Microfilm Viewer, Scanner-to-PC, Printer
THE COMPLETE DIGITAL SOLUTION

E-Image Data
ScanPro 2000

(...fits almost anywhere).

Bring your microform collection into the digital world

The ScanPro uses the latest digital technologies to provide powerful features not found in other microfilm equipment. These features make the ScanPro microfilm scanner so easy-to-use, fast-to-operate and versatile that leading research and academic universities are integrating it into their operations to make the most of their microforms investment. See the video to learn more: <http://www.youtube.com/eimagedata>

View all the information stored on your microforms

The ScanPro 2000 features single-zoom lenses – 7x to 54x or 7x to 105x – which means you don't have to stop your look-ups to change lenses.

High-resolution scans in ONE second!

Complete a high-resolution scan at any magnification in ONE second with just "a single click", making it possible to complete your look-ups and research quickly and efficiently.

Customizable toolbar with save and recall settings

Customize the ScanPro toolbar using just the features needed for your application. Save those settings and recall them when you next use that same application.

The ScanPro 2000 is the 'Power Miser'
The ScanPro 2000's meagre use of power earns it the highest Energy Star rating.

Hooked up to a 24-inch LCD monitor (optional), the ScanPro 2000 is the ideal choice for researchers who need to peruse newspapers, or examine the finer detail of cadastral or parochial documents.

Putting Microfilmed Information At Your Finger Tips And you can use the ScanPro 2000 with a touch-screen!

Microfilm information at your finger tips

With the ScanPro 2000 you can use the latest touch-screen technology to easily bring the information stored on microforms into the digital world with just the touch of a finger.

View your entire microform collection on PC

The Microfilm ScanPro 2000 is the perfect viewer/printer/scanner for all of your microforms from Fiche, 35mm and 16mm Roll Film, Micro-Opagues, Micro-Books, Ultra Fiche, Cartridge Film to Aperture Cards.

And the Microfilm ScanPro 2000 utilises combination carriers that remain on the ScanPro when changing film types. These carriers are designed to avoid film scratching, built for public-use applications, and feature ball bearing guides with an integrated, precision-made digital roll film controller for exceptional film positioning control. This is the viewer that does it all!

Features and Benefits

- High-resolution scan of your microfilm or microfiche in just ONE second.
- Single zoom lenses serve either 7X to 54X or 7X to 105X.
- Time-saving automatic features such as brightness, focus contrast, image-straightening, image-cropping and zoom.
