

MFS 1

Fully Automatic Scanning of Your Entire Microfiche Archive

The SMA MFS 1 fiche scanner simplifies the access to your microfilm archive and optimizes the processes in your company. Here, the best reader-printers philosophy is transferred to the year 2015, by connecting the possibilities of modern technology with innovative software solutions.

With the MFS 1 fiche scanner all common microfiche formats can be scanned quickly, saved to memory stick, printed, or sent via e-mail. Once the capturing process is released the process works fully unattended.

Mobile and Easy to Use

The compact design of the MFS 1 fiche scanner is easy to implement at different locations without time-consuming installation procedures. The intuitive and user-friendly software is easy to operate for every employee after a quick training.

No rescanning with the new Virtual-Rescan-Technology. Multiple rescans and time-consuming readjustments are over. Now, with the MFS 1 fiche scanner you can scan an image only once and adjust all image parameters, such as brightness, contrast, deskew and cropping. Once the image is captured you can store it, send the image via email, share online or print.

Major Advantages of the SMA MFS 1 Fiche Scanner

The MFS 1 fiche scanner will greatly increase your organizations flexibility. You will achieve fast and easy access to your analog microfiche. One can easily transport the scanner to different locations and new users can operate without extensive training.

Technical Specifications and Options
