

ScanPro i9300

Find Your Blip With Exceptional Accuracy.

The ScanPro® i9300 microfilm scanner is the product you've been waiting for to bring your image-marked, or blipped, film into the digital age. We know that original blipped film scanners are aging and you have limited options for repairing them. That's where the i9300 comes in — **it can capture ALL of your blipped film, regardless of brand.**

Utilizing proprietary technology, the ScanPro i9300 finds your blip the first time with exceptionally accurate searching. The machine's precision is bolstered by its unique **PRECISION-Guide film rollers, which tightly control the microfilm's movement, ensuring the most precise image search.**

In addition, the ScanPro i9300 **is a universal scanner that can read and scan ALL microfilm types** — not just image-marked. This one machine allows you to utilize your entire microfilm collection.

THE SCANPRO i9300 OFFERS YOU:

- The ability to work with ALL brands of image-marked film and ALL TYPES of film
- Exceptionally accurate searching
- Easy, simple and fast film loading
- FOCUS-Lock™ maintains image focus throughout optical zoom
- SPOT-Edit™ live image editing of selected texts and pictures while all other areas remain unchanged
- AUTO-Adjust automatic on-screen image straightening, cropping and brightness and contrast adjustment
- Optical Character Recognition (OCR) using the latest ABBYY® Fine Reader software
- Built on the reliable ScanPro® 3000 platform

If you have image-marked
film, this is the solution you
have been waiting for.

Precise. Powerful. Universal.

ScanPro

UNIVERSAL

We like to think that the i9300 is the future of blipped film. Whether you have Kodak, Canon, Minolta, 3M or custom-made film, the i9300 can read them all. Not only that, but the ScanPro i9300 can read and scan regular microfilm! So whatever your microform collection contains, the i9300 has you covered.

REMARKABLY ACCURATE

The ScanPro i9300 offers the most precise image search on the market. Using proprietary technology, it senses every batch, file and page with incomparable accuracy. Standard features on the i9300 further enhance your work. FOCUS-Lock technology ensures that your film image maintains focus throughout the optical zoom. SPOT-Edit allows live image editing of selected text and pictures while all other areas remain unchanged. The AUTO-Adjust tool automatically straightens and crops the on-screen image and properly adjusts for brightness and contrast, making your image clear and easier to work with. Some patrons have referred to this as the "magic button," but we assure you, no magic is required.

COMPACT AND DURABLE

The ScanPro i9300 is designed and built to stand up to the rigors of public use, and its compact size means it will fit in almost any workspace. It's also LibraryQuiet™, so it won't disturb research. All ScanPro products receive free lifetime software updates and have a proven track record of performance and reliability backed by factory-trained and certified dealers. In addition, we pride ourselves on our customer service — updating and training our customers as new features and software updates become available.

ULTRA-HIGH DEFINITION SCANNING

The ScanPro i9300 is built on the ScanPro® 3000 platform. This exceptional, fully-featured unit gives you the benefit of its 26 megapixel camera, which is nearly twice the optical resolution of any other microfilm scanner on the market. The ultra-high definition scanning of the ScanPro 3000 offers the clearest images in the industry.

Since the i9300 is built on the ScanPro 3000 platform, you also can add AUTO-Scan® Pro — fast, accurate and customizable automatic scanning — and the PowerScan Productivity Suite (PPS), the fastest word searchable OCR software in the industry.

i9300

Clearest Image. Highest Zoom. **Fastest OCR Software.**

OCR work on the ScanPro is a SNAP!

Take your research and your ScanPro i9300 to the next level with our exceptional PowerScan Productivity Suite (PPS) OCR software. The PPS software has been leading the marketplace as the fastest word searchable OCR software in the micrographics industry since 2011. Now, we've taken it a step further by adding proprietary high speed processing algorithms — **Smart Navigation Active Processing (SNAP)** — to give you real-time microfilm results. Get information in as little as ONE second.

PPS software with SNAP gives you ease-of-use and efficiency that's never before been seen in the micrographics industry.

Our software gives you the following capabilities, all using a live-screen image. There's no need to save your microfilm image first!

INFO-Link™ To access more information about a topic within your microfilm image, just click the INFO-Link button and the desired word to open a reference source like Wikipedia, a dictionary, or a thesaurus.

Copy to Clipboard Select information on your microfilm image and copy it to the clipboard as text for pasting into any document.

WORD-Search™ Click the WORD-Search button and enter a word in the search box to find that word in your microfilm image. Every instance of the word is highlighted.

Multi-Page Word-Searchable PDF Convert any microfilm image to a single-page or multi-page word-searchable PDF with just one click.

See the ScanPro with PPS Difference!

OCR Feature	PowerScan Productivity Suite software with SNAP from e-ImageData	Competitor Software
INFO-Link (source used Wikipedia)	1 second	67 seconds
WORD-Search	2 seconds	71 seconds (with 20% accuracy in finding selected word)
Copy-to-Clipboard	1 second	57 seconds
Multi-Page Word Searchable PDF (10 pages)	17.4 seconds (1.74 seconds per page)	209 seconds (20.9 seconds per page)

ScanPro i9300 Features and Specifications

Camera USB3: Optical resolution 26 megapixels (over 500 dpi on a letter page)
Reading blips: One, two and three level (highest accuracy), all common sizes
Interface: Intuitive, simple, easy to use with all brands of blipped film
Customizable set-up: Toolbar, tabs, button controls, tool tips, film selection WIZARD
Film selection WIZARD: A single click to automatically set up your scanner
On-screen magnifier (selectable zoom): To read small text and inspect fine details
FOCUS-Lock™ (patented): Maintaining focus throughout optical zoom at all times
Optical image rotation: Maximum resolution for both portrait and landscape images
PRECISION-Guide film rollers: Low inertia, easy-to-thread, ball bearing rollers provide precision control of film image position and movement
Fiche carrier (oversize), combination roll film carriers (16/35mm and M cartridge film)
Optical zoom: 7 to 54x or optional 7 to 105x (optical magnification over entire range)
Scan size: Specify the printing size of the scan image (ScanPro exclusive)
Selectable auto-crop or persistent crop efficiently captures images
Digital image rotation: Rotates film image 90 degrees each click or flips image horizontally
USB3/USB2: Convenient, integrated, front access port for portable flash drives
Soft bright, true color, standard optical green, film-optimized lamps with lifetime warranty
Scan resolution (selectable): 150 to 1200 dpi
Automatic film scanning (included): Partial or full roll (up to 15 images/minute)
Automatic film scanning (optional): AUTO-Scan® Pro (highest speed & accuracy)
MergeClips™: Combine, arrange, and size scans to a single page, plus annotation
SPOT-Edit™ (Live editing provides speed and accuracy): Select any area (or multiple areas) then adjust brightness, contrast, redact or whiteout for any selection
Scan mode: Enhanced grayscale, grayscale, bi-tone (B&W) with or without PDF/L
Microforms (pos and neg): Film, fiche, ap cards, micro opaque & ultrafiche ¹ are optional
Optical straighten (no image size reduction): Select automatic, line or manual
Roll film controls: Image advance slow and fast (forward and reverse), image scrolling, image framing, auto-rewind and familiar physical buttons to control film movements
One-click print buttons: Print to up to three printers located nearly anywhere; print to paper trays to select paper sizes, print to plotters, specify where on the paper to print or center, turn on/off watermark and copyright warnings
One-click scan buttons: Scan to e-mail (direct within the ScanPro software), USB3/USB2 flash drives, hard drive, CD, FamilySearch
All common file formats and word searchable PDF/A (OCR with ABBYY® fine reader)
One-click AUTO-Adjust button: Adjusts brightness, contrast, straightens and crops
Previous/Next: Automatically moves the film one image for each click
PowerScan Productivity Suite (optional)

1. Requires 7-105x optical zoom

ScanPro i9300 Product Information

Fits Almost Anywhere	Patented technology provides compact design
Operating Systems	Win 7, Win 8.1 and Win 10 (32 and 64 bit)
Hardware Interface	USB3 Super Speed
Dimensions (H x W x L)	(18 x 31 x 41) cm (7 x 12 x 16) inches
Weight	9kg (19.5lbs)
Power	100-240VAC 50/60Hz
Energy Efficiency	ENERGY STAR® compliant and labeled
Product Safety	OSHA workplace safety compliant, UL/CSA standards
Scanner and film carrier	12-month factory warranty

PRECISION-Guide film rollers:

With a unique three-roller design, the PRECISION-Guide film rollers tightly control the microfilm's side-to-side movement, ensuring the most precise film control while searching for your image.

Customer Favorites!

SPOT-EDIT:

The must-have feature for working with microfilm that allows you to edit ONLY the part of the image you want to!

AUTO-ADJUST:

Our customers refer to this as the "magic button" because it automatically adjusts the contrast and brightness of your image, while straightening and cropping it on your screen.

CUSTOMER SERVICE:

While it may not be a listed feature, our customers love the proven track record of our machines. Their reliability is backed by our factory-trained and certified dealers. We will be here for you!
